3. Master Plan Strategies

Subsequent to receiving feedback from the first public presentation the study area was divided into 3 key areas; this assisted in producing the Draft Master Plan presented to the community in June 2004. This allows for the staged implementation of the master plan over a period of time to be established by Council. The following strategies detail the improvement works to be completed for each precinct. The precincts are divided as follows.

— Area 1 - First Avenue to Jacana Avenue.
— Area 2 - Jacana Avenue to Third Avenue to Odeley Way.
— Area 3 - Odeley Way to the Boyd Street Lookout.

3.1 AREA 1 – FIRST AVENUE TO JACANA AVENUE

— First Avenue to be upgraded to become a 2 lane road with turfed and planted kerbs.
— Planted entry roundabout at intersection of First and Arcadia Avenues, with appropriate entry sign and directional signage panels.
— Upgrade existing pathway to be a 3m wide shared cycle and pedestrian pathway on the southern side of First Avenue.
— To highlight the entry into Woorim formal plantings of Brachychiton Acerifolius (Flame Tree) are to be planted around the entry roundabout and at intersections of side streets.
— Informal native tree planting, and coastal dune grasses, along both sides of First Avenue will visually highlight the informal bush character of First Avenue and the greater Woorim area.
